 Mathematics

The Department of Management Sciences organizes the international forum
 (visual = virtual)

Days: November 07-08, 2023 About:

**Towards adopting artificial intelligence strategies in industrial
 institutions and achieving sustainable leadership (Sustainopreneurship)**

Honorary President: Prof. Dr. Boffendi Toufik, Rector of the University
General supervisor: Dr. Kimouche Bilal, Dean of the College

Chair of the forum: Dr. Chili ilhem
Vice President of the Forum: Dr. Ammari Samir
Chairman Scientific Committee: Dr. Bousba sihem
Vice Chairman Scientific Committee: Dr. Boujaada Elias
Chairman Organizing Committee: Dr. Messikh Ayoub
Vice Chairman Organizing Committee: Dr. Mekitta hamza
Forum coordinator: redjem Noureddine

Problematic

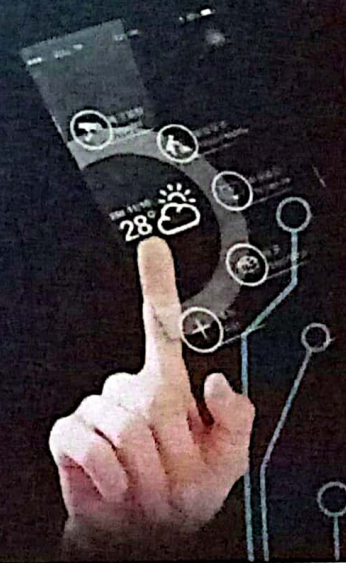

Our current era is characterized by a scientific revolution and great technological development in the adopted techniques and methods. Which affected all areas, fields, and institutions of all kinds. In light of this unprecedented progress, the countries of the world, societies, and institutions must benefit from it, abandon traditional strategies and move to modern strategies. So that the information revolution has become the main nerve of all changes in various aspects of life. Its basis is the emergence of the Internet, and the concept of artificial intelligence. The latter is considered one of the important disciplines in the field of the digital economy, as it is not limited to the electronic field only, but rather has multiple uses in different fields and multiple sectors, and justifies this by its recent adoption in the field of education, and industrial sectors that have a direct impact on increasing the economic growth of countries, and achieving excellence. for institutions. In the context of competition between different institutions, especially in the field of industry, it has become necessary to adopt artificial intelligence strategies, move towards the digital economy, and use expert systems that support decision-making at the level of the institution as a whole.

Industrial institutions are of great importance in developing countries and improving their economy, and they also work to keep pace with modern concepts and development of the methods used, to occupy the forefront and achieve sustainable leadership, according to artificial intelligence industrial establishments are also transit and export areas for manufacturing products in various regions of the world. Thus, improving performance and increasing competitiveness.

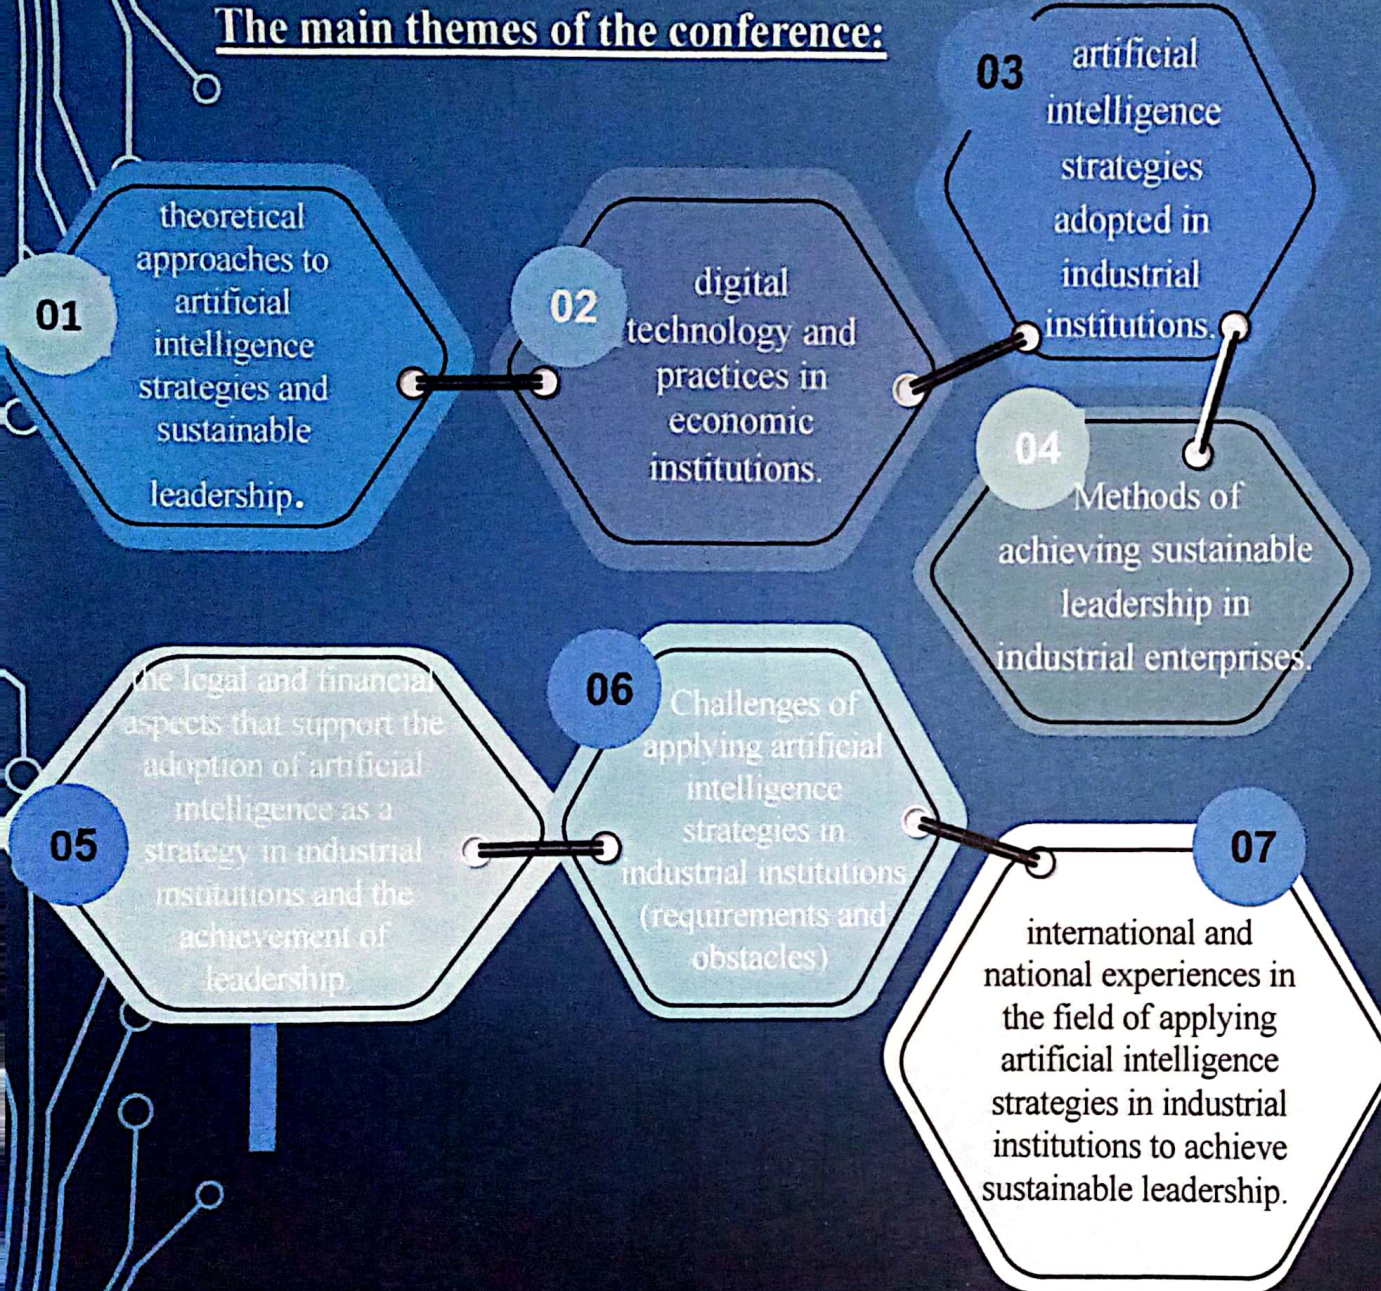

The problem of the forum:

It revolves around the following question:

What are the strategies for artificial intelligence adopted in industrial institutions to achieve sustainable leadership?

The main themes of the conference:

Forum objectives:

- Monitoring the most important strategies for artificial intelligence, and future transformations towards it;
- Showing the extent to which industrial establishments depend on strategic digital transactions, and suggesting digital applications that facilitate administrative work;
- Introducing artificial intelligence and sustainable leadership and highlighting their impact on the performance of industrial enterprises;
- Understand the elements that are essential to the successful implementation of an AI strategy in organizations;
- Studying the ability of industrial enterprises to integrate digitization and modern electronics to achieve sustainable leadership;
- Shedding light on international and foreign experiences on the trend towards adopting artificial intelligence strategies in industrial institutions and reaching sustainable leadership.

Targeted and Stakeholders:

01

Experts in the field of artificial intelligence.

02

Professors and researchers from different countries of the world

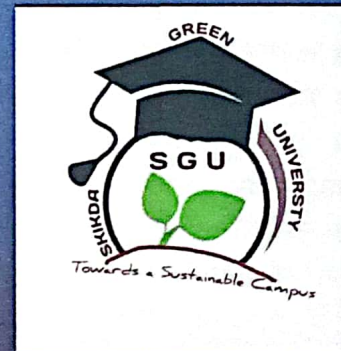

03

- relevant ministries and directorates;
- Algerian industrial enterprises;
- Entrepreneurs and startups;
- industrial investors;
